

# GIS Developer - LEVEL 1

*Come work at a rapidly growing engineering firm that is staffed with industry experts, has great benefits, and prides itself on developing our people.*

## The Company

Planview Utility Services is an engineering firm that provides engineering design, sub-surface investigation and GIS services to telecommunication, gas, electric utilities and the utility industry at large. Our workforce is a mix of veterans of the industry and youthful enthusiastic technical resources. We have pride in our collegial culture and host multiple regular corporate sponsored social activities. Our embrace of the use of technology plays a large part in our success.

## The Position

As a developer with GIS Solutions department you will be responsible for (but not limited to):

- Developing UI for all levels of users
- Incorporating new techniques and technologies into existing and new applications
- Maintaining and developing existing applications through user feedback and program needs
- Interacting with users and clients to better understand their needs and help interpret business and program requirements
- Participating in internal meetings to review progress, milestones, and challenges
- Independently maintaining schedule requirements and timelines with advisory help from senior team members
- Working within a high pressure and dynamic environment with a group and independently
- Play varying roles on projects as per the specific needs of the project and the coordinator

## Responsibilities

- Reports to the GIS Solutions Manager
- Working with daily project loads and dynamic issues or changes to existing programs
- Minimum 1 years of experience
- Strong problem solving, troubleshooting skills and attention to detail
- Ability to provide concise feedback to the project team on task timelines and issues
- Ability to deal with multiple projects and conflicting deadlines
- Strong self-learning capabilities to adapt to new requirements and problems as well as learning new platforms as the needs arise
- Experience with online mapping tool development is an asset
- Experience with GIS industry is an asset
- Experience with the Utility Industry is an asset

## Requirements

- Front end :Backbone Js , JQuery (Responsive UI/UX Design)
- Backend :Python Pylons, Apache
- DB: PostgreSQL, MS SQL Server
- TDD(Test Driven Development)
- Unit Testing

## The Location

Planview Utility Services has 3 offices – Markham, London and Ottawa. Our clients and their projects are based throughout the province. *This position will be out of our Markham or Ottawa office.*

## Why You Should Apply

If you like to work as a part of a team, work on challenging projects, use a variety of software, learn new skillsets, deal with a dynamic slate of technical work, and come up with new ideas.

## Note

Planview Utility Services Ltd is an Equal Opportunity Employer.

In accordance with the Accessibility for Ontarians with Disabilities Act, 2005 and the Ontario Human Rights Code, Planview Utility Services Ltd will provide accommodations to applicants with disabilities throughout the recruitment, selection and/or assessment process. If selected to participate in the recruitment, selection and/or assessment process, please inform Human Resources staff of the nature of any accommodation(s) that you may require.
